

SHAHIN SALEK TOOTOONCHI

Infrastructure & Cloud Manager | Cloud Infrastructure | DevOps | AI

Istanbul, Turkey | +90-546-115-1705 | +98-902-929-2362 | shst69@gmail.com | linkedin.com/in/shahin-salek

PROFESSIONAL SUMMARY

Technology and infrastructure professional specializing in cloud infrastructure, servers, hosting platforms, virtualization, networking, DevOps, automation, and IT operations. Experienced in building and managing commercial infrastructure for VPS, hosting, domain, and dedicated-server services, integrating multiple operational modules, and leading infrastructure initiatives. Also holds a Master's degree in Artificial Intelligence, with research focused on computer vision and meat quality grading using convolutional neural networks.

CORE EXPERTISE

Cloud Infrastructure • Hosting & VPS Platforms • Server & Data Center Infrastructure • Virtualization • Networking • Cyber Security • DevOps & Automation • Infrastructure Architecture • Service Provisioning • Monitoring • IT Management • Artificial Intelligence • Computer Vision

PROFESSIONAL EXPERIENCE

INFRASTRUCTURE & CLOUD MANAGER — Oxin Tech Information Technology

Present

- Designed and built the infrastructure supporting the company's server and hosting sales operations.
- Implemented and integrated 10+ modules to expand infrastructure for VPS, web hosting, domain registration, and related services.
- Managed and optimized infrastructure components supporting automated service provisioning and customer-facing technology operations.

INFRASTRUCTURE MANAGER — Digicloud Bilişim Limited Şirketi

2024 – Present

- Manage IT infrastructure and cloud/server operations for a Turkey-based technology company.
- Oversee infrastructure planning, deployment, administration, optimization, and service reliability across server and cloud environments.
- Support the development and operation of hosting, VPS, dedicated-server, networking, and related infrastructure services.

FOUNDER — Shahin Smart Cloud Computing

2026 – Present

- Founded and manage a technology company focused on cloud computing, IT infrastructure, hosting, server, networking, and related technology services.

ENGINEER & DEVELOPER — Tehran Institute of Technology

Mar 2021 – Present

- Developed internal and external software infrastructures, including Microsoft CRM and BI technologies.
- Revised and improved information security systems and firewall services.
- Managed HP server infrastructure and participated in strategic IT infrastructure development initiatives.
- Developed and launched VOD (Video on Demand) systems and supporting infrastructure.

IT MANAGER — Toshan

Aug 2019 – Mar 2020

- Set up hosting service infrastructure and HP servers with iLO in the data center.
- Configured management switches and WHMCS for hosting-service management.
- Launched a call center supporting hosting services.
- Implemented Hyper-V and VMware ESXi environments for VPS and dedicated-server development.

INTERNAL DIRECTOR — Yatai Online Store (IT & Communication Technology)

2017 – 2020

- Developed and managed IT and communication technology infrastructure.
- Supervised hardware and software requirements and performed needs analysis.
- Developed the company's strategic plan and identified SWOT and BSC frameworks.

IT SUPERVISOR — Sinacoplast

2014 – 2020

- Implemented system infrastructures and developed network environments.
- Supervised and monitored industrial devices.
- Improved system efficiency and operational effectiveness.

SERVER & HOST TECHNICIAN / ADVISOR — Farasoo Samaneh Pasargad

2013 – 2017

- Supported and developed hosting, domain, and server services.

- Configured Hyper-V and VMware ESXi for VPS and dedicated-server environments.
- Provided IT help desk and customer support.
- Troubleshot VPS and dedicated-server issues across Windows and Linux environments.

SERVER & HOST TECHNICIAN / ADVISOR — Ashyaneh Information & Communication Technology

2011 – 2013

- Supported and developed hosting, domain, and server services.

EDUCATION

Master's Degree — Artificial Intelligence

Thesis: "Improving meat quality grading by using convolutional neural networks"

Bachelor's Degree — IT Engineering, Software Development Concentration | University of Electronics; Azad Branch | 2020 – Present

Relevant study areas: Programming, Computer Networks, Cyber Security, Computer Systems, Artificial Intelligence, Mathematics and Modelling.

TECHNICAL SKILLS

Infrastructure & Cloud: Cloud infrastructure, server infrastructure, hosting platforms, VPS, dedicated servers, service provisioning

Virtualization: VMware ESXi, Hyper-V, VPS environments

Systems: Linux, Red Hat-based systems, Windows Server

Networking & Security: Network management, MikroTik, firewalls, information security, load balancing, proxying

Web & Database: Apache, Nginx, LiteSpeed, MySQL, SQL Server

Monitoring & Operations: Zabbix, OPManger, server troubleshooting, performance/load testing

DevOps & Automation: Bash, PowerShell, Linux/Windows DevOps, automation, integration

Technology Management: IT strategic management, infrastructure planning, R&D;, staff management

CERTIFICATIONS

- Google Ads Display Certification
- LinkedIn Skills Assessments: AWS, Bash, Git, Linux, Microsoft Azure, Windows Server, WordPress, MySQL
